

A large, dense grid of various geometric shapes and symbols, including lines, squares, triangles, and abstract forms, arranged in a pattern that resembles a barcode or a data visualization. The shapes are primarily orange and black, set against a white background. The grid is composed of many small, irregular shapes that vary in size and orientation, creating a complex, textured appearance. The overall effect is one of a highly detailed, abstract pattern that could be interpreted as a form of data or a stylized representation of a building's footprint.
